

About ACE Advanced

ACE Advanced is a powerful variant of the ACE Family that encapsulates all the necessary features required to have a secure connection between your head office and your branch office. It allows you to access all your head office server files over a secure connection from any remote location.

The **ACE Advanced** has a unique feature of dual sim connectivity with Active to Passive mode and multiple ports to allow multiple connections so that you have **100% uptime**, even at remote locations with uncertain internet connectivity. It also allows **Bandwidth Management and Auto Failover**, so you are always connected, even if one connection is down.
